### Diesel Power Added to Hydro Tek Cold Water Power Washer Series

The CP30004D is a full-featured diesel-powered, cold water power washer. With 3000 psi and 4 gpm, the unit's front mounted controls, electric start engine, and high performance pump offer easy operation and full rated output for fast cleaning. Direct injection on the diesel engine produces increased power and lower fuel consumption. Full pressure lubrication offers superior cooling and performance combined with full-flow oil filters for longer engine and component life. The protective frame, double lift handles, and four wheels offer exceptional portability in rough terrain.

### GP Introduces New Pulse Pumps

General Pump has introduced new innovative pulse pumps which permit cleaning solution application at system pressures up to 1500 psi (100906) or 3000 PSI (100152), The General Pump pulse pumps directly mount onto one of the drive pump inlet valve ports by using a special valve and adapter and draws cleaning solution with each stroke of the drive pump. Chemical exits through the high-pressure line and is delivered into the high-pressure discharge line of the drive pump after the pressure unloader valve. These pulse pumps feature corrosion-resistant, 303 stainless-steel construction and NBR diaphragm offers resilience and chemical compatibility. The 100152 pulse pump features an integrated ball valve which allows shut-off when using water pressure up to 3000 psi.
